Senior Web Developer

Nilsen, USA

web.programming-hero@gmail.com

Dear Jhankar Mahabub,

Assalamualaikum, Hope you will be glad to know that I am looking forward to joining your company/team. I've tried to outline below what my qualities are and what I analyze about your company for working with you. Hope you try to analyze it.

I am very much comfortable with some of my skills that I recently learned for front end web development **HTML5, CSS3, JavaScript, React.js, React Bootstrap, TailwindCSS, Daisy UI** and some other css libraries. I have done some projects using these languages.

And I also learned **Node.js, MongoDB, ExpressJS** for server side and back end development. With these skills I completed some full stack web development with so many new features.

Also I have some **familiar** skills like **Redux, Next.js, Material UI, Framer Motion** and am **still learning new technologies**.

I analyzed and found that **Programming Hero** is one of the world's leading companies providing **MERN Stack** web development service to various companies.

Recently I worked at a company as a **Social Media Manager** and I am always interested to join any developers team and share my skills. I feel blessed to join their team of developers in this journey of Programming Hero.

I think it wouldn't hurt to have a meeting with you to find out more about your company and what I can do for the company, if you don't mind.

Sincerely

MD. Nasir Ullah
